

3 APR 1970

MEMORANDUM FOR:

25X1A

I have intended for some time to chat with you about how you do or we should go about informing people in the Support Offices of pertinent doings which come up at the IP Board Meetings. I have just heard about a for-instance which supposedly was in front of the IP Board before a decision was reached -- the NSA/NPIC encrypted data link. I gather that there is a Support commitment involved and apparently no word ^{went} to the Support Offices from us that the subject was being considered. I don't know if you were present at the meeting concerned and/or talked to anyone on the specific subject. I do believe that we need to have a system for advice here as well as to the Offices and so would like to talk when you have a moment.

John W. Coffey
